

## OVER 60 YEARS SUPPORTING THE WARFIGHTER

### WE SOLVE KEY CHALLENGES TO ENSURE MULTI-DOMAIN OPERATIONAL READINESS

- ANSER is an integral government partner in defining and prioritizing mission essential functions and capabilities
- ANSER provides mission assurance services across a diverse client base, encompassing a spectrum of operational and technical expertise combined with analytic skills and processes
- ANSER enables commanders, applying multi-domain resilience expertise to mitigate risks in system interdependencies

### ANSER BRINGS

ANSER is an outstanding Indo-Pacific performer delivering niche expertise and a stable workforce across a diverse portfolio supporting: mission assurance and integrated defense program management/execution; major command operations & data fusion; training & exercise program development/execution; strategic planning & communications; multi-service mission assurance through energy resilience and risk assessments; Defense Support of Civil Authorities disaster response training, operations & policy development; Joint test & evaluation.

### ANSER PACIFIC EXPERTISE HIGHLIGHTS

Exercise Planning and Execution: ANSER provides worldwide Joint/Combined/Multi-national Training and Joint Exercise Event Life Cycle (JELC) planning. ANSER Exercise Planners apply extensive experience in Joint, Army, Air Force, Marine Corps and Special Operations communities to provide PACAF, MARFORPAC, DTRA, NGB and the Joint force with exercises that validate current plans while cultivating enhancements in Joint, Combined and Multi-Domain operations. This includes our uncommon expertise in evaluating the procedures and processes required to respond to accidents/incidents involving improvised WMD, chemical & biological agents, radiological materials through DTRA's Security Cooperation AM&E program support.

Mission Assurance/Risk Assessments: ANSER staff developed and conducted the Joint Mission Assurance Assessment Pilot and have provided installation level assessments and risk mitigation recommendations to HQ Pacific Air Forces since 2002. Our assessments are scaled and tailored to each specific installation, addressing the risks and mission sets delivered from each location. In addition, ANSER develops Defense-wide mission assurance policy and instructions through our long-time support to the ASD(HD&HA) and enhances Joint mission assurance in energy resilience through our execution of the Black Start program.

Disaster Response and Defense Support of Civil Authorities: ANSER provides instructors and facilitators to support USNORTHCOM training of senior National Guard and Title 10 leaders in effective emergency/disaster planning and response processes. ANSER helps coordinate and facilitate three classes: the JTF Commander's Course; The Joint Domestic Operations Course; and the Dual Status Commander Orientation Course (DSCOC), which prepares senior National Guard and Title 10 Deputies to integrate a cohesive and complete DoD response to disasters, CONUS and in the Pacific.

### OUR APPROACH

- Recruit and retain expert analysts from varied disciplines and employ the right analytical tools to address agency challenges
- Simplify complexity by breaking down issues and challenges to understand components
- Employ subject matter experts with demonstrated experience in supporting their client across the team

### MISSION SECURITY DIVISION CAPABILITIES

Major Command Operations	Doctrine, Training, Exercise Development	Intelligence Collection/Analysis
Mission Assurance Assessments	Joint Training & Education, LMS	Information Assurance
Mission Decomposition	Organizational Management	Strategy & Plan Development
Risk Assessment	Critical Infrastructure Protection	Antiterrorism/Force Protection
Developmental and Operational Test & Evaluation	Strategic Communication Synchronization	Concept of Employment (CONEMP) Development

### CURRENT CLIENTS

ANSER serves over 65 organizations throughout the Department of Defense and Intelligence Community:

## PUBLIC SERVICE. PUBLIC TRUST.

ANSER delivers capabilities to operational forces that are directly relevant to US Army Pacific. A sample is below.

### Marine Forces Pacific Operations Support

- Participate and lead the development, coordination and execution of JCS, CCMD, Component and Partner exercises across the USINDOPACOM AOR
- Build, coordinate and deconflict 5-year training and exercise plans across CCMDs, Components, partner and host nation stakeholders
- Operations Planning and Theater Security Cooperation of Joint and multilateral interoperability
- Common Operating Picture management support to G3 Command Operations Data Fusion Center
- Force Protection and Antiterrorism integrated protection program policy, planning, development and analysis

### Pacific Air Forces Mission Assurance and Risk Management and Exercise Support

- 20 years of mission assurance assessments of USINDOPACOM critical infrastructure and assets, to identify threats and vulnerabilities in order to manage and mitigate risk
- Develop curriculum and train Air Force and Joint personnel in Antiterrorism, Intelligence Preparation of the Operational Environment and Fly Away Security
- Exercise Planning and Development including Theater Security Cooperation. Tactical through strategic level engagement with partner nation emergency response and military
- Exercise Logistics support including contingency plans and exercise requirements for aircraft and personnel, creation of Time Phased Force Deployment Data (TPFDD)
- Conduct thorough financial analysis, support funding efforts, and skillfully managing budgets to enable the timely execution of key projects and maximizing operational capabilities

### Secretary of the Air Force for Installations & Environment & Marine Corps Installations Command Energy Resilience Readiness

- Conduct Energy Resilience Readiness Exercises (Black Start Exercises) and TTXs at USAF, Navy, Marine Corps and Joint installations located CONUS and in the Pacific
- Assist the installation in navigating the mission-specific risk, mitigation planning process and build installation energy resilience confidence prior to the Exercise
- Secure broad stakeholder participation to ensure wide-ranging scope and duration to assess mission assurance, identify and evaluate resilience gaps, and recommend integrated solutions to address gaps

### National Geospatial Intelligence Agency

- Experimentation and Operational Test & Evaluation range support and assessment of geospatial intelligence analysis systems and applications
- Oversight, governance and road-mapping of NGA's artificial intelligence enabled Photo-Int program
- Model Based Systems Engineering

### Army Office of the Provost Marshal General (OPMG) Planning and Analysis Support

- Developing the Antiterrorism Communication Synchronization Plan and Strategic Communication
- Service-wide Antiterrorism strategies and strategic communication synchronization planning
- Terrorist/extremist threat analysis, integration, and prevention measures
- Mission assurance analysis, training, and technical support for an array of OPMG offices and programs
- Antiterrorism Doctrine Development and Force Protection program support
- Military Police Force Strategic Planning and Police Intelligence Operations advisory services
